DARWIN

THE INDELIBLE STAMP

EDITED, WITH COMMENTARY BY,

NOBEL LAUREATE

JAMES D. WATSON

"Man with all his noble qualities...still bears in his bodily frame the indelible stamp of his lowly origin."

—Charles Darwin

Here for the first time in one volume, are four of the most influential works by Charles Darwin:

- *On the Origin of Species*, arguably the most important scientific work of the nineteenth century.
- *The Voyage of the Beagle*, a captivating travelogue richly stocked with observations that helped guide the young Darwin through his evolutionary world view.
- *The Expression of the Emotions in Man and Animals*, which explored the origin and nature of the mind.
- *The Descent of Man*, which explored the origins of humans and their history.

With this comprehensive anthology, readers can trace the development of Darwin's own thinking as he challenged conventional wisdom, unveiled fundamental laws of nature, and documented the outstanding power and creativity that drives evolution.

Each book in the anthology is illuminated by commentary from Nobel

(Watson, 2005)
